Bait and switch

Rotate two different formulations to prevent cockroach bait aversion

Alpine[®]

Cockroach Gel Bait
Rotation 1 & 2
Reservoirs

When a single gel bait product is used exclusively for roach control, research shows that cockroach strains can demonstrate feeding aversions. BASF developed **Alpine**[®] cockroach gel bait rotation 1 reservoir and **Alpine** cockroach gel bait rotation 2 reservoir to help prevent bait aversion from developing in your accounts.

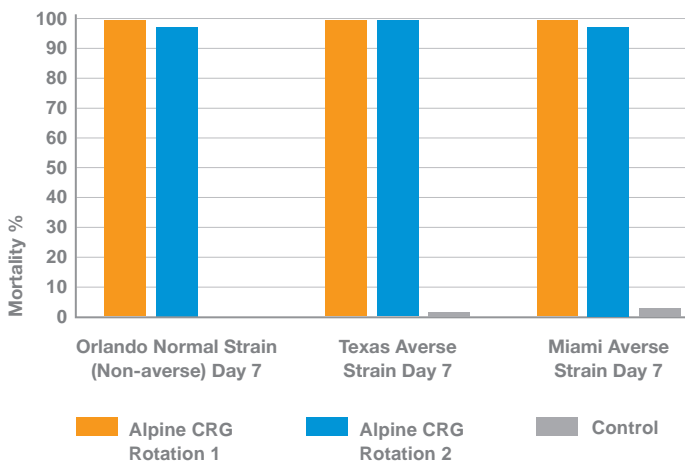

This fast-acting duo, a part of the Complete Cockroach Solution, provides baits that are attractive to both gel-bait-averse and non-gel-bait-averse cockroaches.

Use this rotation system with confidence, knowing that each formulation provides different food ingredients and quick, reliable control.

- **Attractive:** Both bait matrices appeal to gel-bait-averse and non-gel-bait-averse cockroaches.
- **Fast Acting:** These BASF products begin killing cockroaches within minutes after exposure to the bait.
- **Reliable:** This rotation system guarantees different food ingredients in each rotation.

Attractive Baits

Efficacy of Alpine® Cockroach Gel Bait Rotation 1 & 2 Reservoirs Against Normal and Gel-Bait-Averse German Cockroaches

Dangsheng, Liang, PhD., Apex Bait Technologies, Inc.,
Report Number: 1505. Date 11/2009

Offers two palatable bait matrices appealing to gel-bait-averse and non-gel-bait-averse cockroaches

Reliable Rotation System

Alpine Cockroach Gel Bait Rotation 1 Reservoir
Article#: 59014068

Alpine Cockroach Gel Bait Rotation 2 Reservoir
Article#: 59014067

Packaging: 1 Box (4x30 gram) Syringes

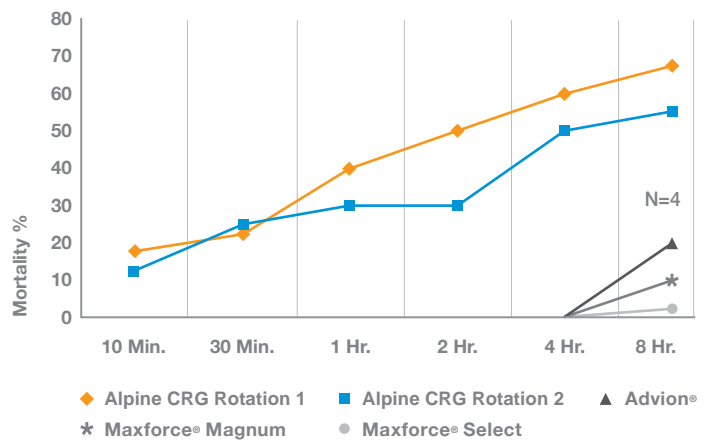

Guarantees different food ingredients in each rotation

Always read and follow label directions.

Fast Acting

Efficacy of Alpine Cockroach Gel Bait Rotation 1 & 2 Reservoirs Against Male German Cockroaches Orlando Normal Strain

Silverman, Jules, PhD.,
Trial ID Number: 15HIR014. Date 12/2015

- Both **Alpine** cockroach gel bait rotation 1 & 2 reservoirs begin killing roaches within minutes after being exposed to the bait.
- Slower-acting gel baits can take hours before roaches begin to die after exposure to bait.

Reduced Risk Status

Contains the active ingredient, dinotefuran, the only insecticide on the market granted Reduced Risk status by the EPA for both public health use and food handling establishments.

Rely on **Alpine** cockroach gel bait rotation 1 & 2 reservoirs as a part of the Complete Cockroach Solution from BASF.
